Hope for Haiti

MISSION STATEMENT: To improve the quality of life for the Haitian people,
particularly children, through education, nutrition, and healthcare.

A Letter from Our President and CEO
and Our Founder and Chair

Dear Friends and Partners,

Because of all of YOU we are so proud to reflect on 2013 and share some of the many accomplishments made possible through your support. Our teams in Haiti and in the United States have been working hard to ensure that each charitable \$1 you've invested in Hope for Haiti yields the greatest return on tackling the root causes of poverty affecting our children and their families.

Thanks to all of our partners, Hope for Haiti has been able to show real success and geometric progress in poverty reduction through our focus on building sustainable communities.

Hope for Haiti's holistic community development approach is a model that connects, heals, and empowers rural communities on a road to sustainable long-term development. Within this annual report, you will see how Hope for Haiti's focus on five key areas of development (1. Education, 2. Nutrition & Healthcare, 3. Clean Water, 4. Infrastructure, and 5. Economy), is creating transformational change.

Thanks to YOU, Hope for Haiti will be celebrating its 25th Anniversary next year and the Board of Directors and Staff are currently developing an exciting 5-year strategic plan for the organization's growth. We are looking forward to sharing our vision with you and receiving your feedback, as we consider you our daily partners in solving some of our world's most pressing challenges. WE thank you for being a part of our global family who works to create sustainable solutions to fighting poverty.

There is HOPE,

Tiffany R. Kuehner
President and CEO

JoAnne M. Kuehner, DM
Founder and Chair

Accomplishment Highlights
2012 - 2013

Education

- ★ Subsidized teacher salaries at 40 partner schools for over 450 teachers, impacting 10,000 students.
- ★ Bookshare fund for 33 schools replaced 15% of the 27,500 books distributed in 2010.
- ★ Funded the construction of two three-room school blocks in rural communities.
- ★ Piloted the Hope for Haiti Summer Institute - an intensive three-day training covering topics including problem solving, classroom management, and differentiated instruction.
- ★ Provided back-to-school funds to 40 schools to purchase school supplies, make repairs, and provide teacher trainings.

Nutrition

- ★ Courtesy of Vitamin Angels:
 - ★ 39,500 doses of vitamin A supplementation to aid in healthy early childhood development.
 - ★ 1,837,080 tabs of prenatal multivitamins distributed.
 - ★ 576,000 tabs of children's multivitamins distributed.
- ★ Courtesy of Heinz:
 - ★ 35,820 sachets of MicroNutrient powder administered to fight anemia and iron deficiency.
 - ★ 597 infants and children reached.
- ★ Courtesy of Worm Project/WowNow:
 - ★ 1,146,000 tabs of de-worming medication received, administered and distributed.
- ★ At partner facility Baraderes:
 - ★ 751 women provided with prenatal care.
 - ★ 825 children included in malnutrition recuperation program.
 - ★ 93 midwives equipped and trained to deliver 509 healthy babies.

Healthcare

- ★ Taught 780 hours of public health education lessons to over 2,100 students in 12 schools, making the total number of hours taught since the program's inception 3,597 hours.
- ★ Graduated a second class of community health workers.
- ★ Commenced the training of 13 new community health worker candidates.
- ★ Supported the salaries of two doctors and a laboratory technician in areas hard hit by cholera.

5,480
VOLUNTEER
HOURS!!

- ★ Trained 12 Haitian doctors and nurses on advances in dental, diabetes, hypertension, and asthma treatment and healthcare management.
- ★ Distributed 226 shipments of medications and supplies to 45 partners in Southern Haiti valued at over \$9,500,000 USD.
- ★ Cared for 1,234 wounds, most resulting from diabetes and accidents.
- ★ Provided primary, laboratory, and dental care to over 15,000 patients and coordinated 33 emergency medical procedures for patients suffering from cataracts, tumors, and hernias.
- ★ Cared for 415 Chronic Illness patients suffering from diabetes, hypertension and asthma.
- ★ Provided free consultations for 858 patients who could not otherwise afford medical care.

Community Development Initiatives

- ★ Filtered 40,000 gallons of potable water with Hope for Haiti's 12 solar-powered UV water purification systems.
- ★ Provided over 700 students in two rural school communities with locally produced, hot and nutritious meals each day.
- ★ Produced and distributed or planted over 3,900 mango, avocado, cherry, cedar, orange, lime, papaya and oak seedlings in two rural school communities.
- ★ Grew over 10,000 fresh vegetables in 6 months in two school gardens, to contribute to two nutritious school lunch programs.
- ★ Installed 20 Bosch 230 watt solar panels in two rural schools, providing renewable electricity to over 700 students and teachers.
- ★ Launched pilot Healthcare Access Program providing free medical care to 250 rural patients.
- ★ Reached over 10,000 people with emergency supplies and food in the immediate aftermath of Hurricane Sandy.
- ★ Graduated the sixth class of the Cooking School with over 26 young men and women now employed in homes, restaurants, or have started their own businesses.

EDUCATION

90%
of Haiti's Schools
are private schools

“We are pleased to see that you are actively monitoring the effectiveness of your Education Program and that you are carefully evaluating your support to focus on the schools that are making the greatest impact and need the most assistance.”

Helene O'Neil Shere,
President of The W. O' Neil Foundation

The enrollment rate
for primary school is

67%

but only 30%
of those students will
reach the 6th grade

Education, our longest-running program, is what Hope for Haiti considers to be the keystone to development. This year, Hope for Haiti's support has directly impacted the quality of education at 40 schools and the lives of 10,000 students and over 450 teachers. One major highlight is that six of Hope for Haiti's partner schools were able to add a new grade level during the 2012-13 school year, providing better access to education for students in rural communities. By supporting, strengthening, and expanding the resources of existing schools, we are providing children with the tools they will need to succeed.

“I dream of healing accident victims, especially doing their sutures, and I always stop and try to help when there is an accident in my community.”

Education: A Priceless Investment to Community Success...

Despite Marie's mother and father being unable to attend school themselves and possessing an extremely low literacy level, "my parents always help me because they believe in me," reflects Marie. Through her involvement in her local Church choir, Marie met long-time Hope for Haiti program partner Fr. Max Mathieu - who helped her continue through secondary school despite financial hurdles.

"I finished high school and passed my state exam, allowing me to continue to higher education," says Marie proudly. Hope for Haiti provided Marie with a scholarship to attend nursing school in Les Cayes. "I dream of healing accident victims, especially doing their sutures, and I always stop and try to help when there is an accident in my community." Through nursing, Marie hopes to have a better life for herself by studying and working hard. For the future of her country, Marie hopes that the country changes so there is more opportunity for ambitious young people. "Haiti doesn't have what it needs for the people living here, but it is very beautiful Hope for Haiti helps people who don't have the means to help themselves, especially for children going to school."

Marie has every confidence that she'll become a great nurse who can invest back into her community by providing quality healthcare. For more information on Marie Francelene, check out her "This is My Haiti" profile on the website hopeforhaiti.com.

NUTRITION & HEALTHCARE PROGRAM

Hope for Haiti works to improve the overall health of our partner communities with the patient at the center of this process in a three-pronged strategy:

Prevention & Outreach

Distributing medications and supplies to rural partner facilities throughout the South and providing school-based public health outreach to students and their communities.

Treatment & Follow-up Care

Provided at our Infirmary, patients receive low-cost quality primary, laboratory, dental, surgical, and wound care. In emergency cases, we coordinate treatment through the Robert E. Hord Emergency Medical Fund.

Capacity Building

Haitian medical professionals receive advanced medical training from international specialists to provide greater quality of service and educational resources to their local community.

in their care

Investing in Healthcare is one of the greatest gifts one can make to increase the quality of life for an individual. Our family has seen Hope for Haiti's work on the ground firsthand and the growth of the organization. It is the staff and their dedication to providing quality service to those who need it most, which makes the programs so successful.

- Jay and Mary Sandak,
The Herbert and Nell Singer Foundation

Alisna Menard is at least 100 years old! She used to be homeless and lived on the street, but she was referred to our partner, the Foyer St. Etienne, two years ago. She is often heard saying, **"M'ap priye p'aw."** - **"I will pray for you."**

In partnership with The Missionary Oblates of Mary Immaculate, Hope for Haiti has long supported the Foyer St. Etienne, a home which cares for elderly, and often abandoned, residents in Les Cayes. As caretaker Fr. Fred Charpentiers says, *"For our residents who have left behind the slums, back porches, and a life of begging, this place is indeed a taste of heaven, and finally a real home."*

**Made possible by partners like The Harry and Jeanette Weinberg Foundation who provided matching grant opportunities to bring needed medications and supplies to the most remote communities with whom we partner.*

CLEAN WATER PROGRAM

Hope for Haiti installed and maintains 12 solar-powered U.V. water purification systems and 1 well in community accessible locations. Each clean water site is closely monitored monthly and tested by Hope for Haiti's Haitian water technician. In conjunction with Hope for Haiti's school-based Public Health program, trained community health workers educate over 2,400 students and their families on the importance of clean water, sanitation and hygiene. This approach ensures the development of healthy habits at the youngest of age.

Father Belizaire, the Parish Head of Cherettes, who oversees six of our Public Health partner schools, explained that he could see that the messages of the Community Health Workers were getting across to the students because they started washing their hands on a regular basis, after they went to the bathroom and before they ate.

"After seeing the comparison test of the local source vs. the Hope for Haiti system water, one mother swore she would never put her children's health in danger by giving them dirty water again." Harry Victor, Hope for Haiti's water technician.

- ★ "4 million people in Haiti lack access to safe drinking water." (Water.org)
- ★ Hope for Haiti's UV solar powered water systems produced 40,000 gallons in 2012-2013
- ★ Employing locals and educating communities through regular outreach
- ★ Infant-child mortality tied to diarrhea (one effect of dirty water) three times the regional average

"We've proudly supported Hope for Haiti's Clean Water Program since the beginning. It's essential to the health and development of all communities and we believe a basic human right. We've seen its success first-hand and Hope for Haiti's approach is an investment well-made!"

- Jim and Judy Boyle

Hope for Haiti Board Member, Dr. Brian Childs, visits one of Hope for Haiti's Clean Water sites in October 2013

INFRASTRUCTURE

Every community needs to invest in infrastructure, but in low-resource settings like rural communities in Haiti, a relatively small investment in the construction of a school building, solar power, or basic benches and tables can make all the difference. This one school structure started as a corrugated metal roof with hand cut wooden posts. Today, thanks to the long-term commitment from The Bob and Renee Parsons Foundation and GoDaddy there are 12 classrooms, solar powered electricity, a school garden, a soccer field, and the school and community has dreams for greater growth.

This past year, in addition to completing another school block, Hope for Haiti worked with volunteer engineers from Connecticut-based firm Building and Land Technology to reroute a river that was headed to wash the school away by flooding. Within two months, this river was successfully rerouted, protecting the school from future flash floods due to hurricanes.

The infrastructure improvements have not only helped to provide a greater quality learning environment for the students, but the school has become the center of the community. The buildings are used after school hours for:

- ★ Adult Literacy Classes
- ★ Community Meetings
- ★ Emergency Distributions
- ★ Small Business Development

We had the opportunity to return to Haiti in 2013 to see first-hand the difference our support has made. The transformation is apparent not only in the surroundings, but also on the faces of every member of the community. There is a sense of renewed hope and joy that is truly inspirational.

- Bob and Renee Parsons

has regular access
to electricity

ECONOMY

Hope for Haiti entered into an exciting partnership this year with Yunus Social Business Haiti S.A. (YSB Haiti), made possible by the Dalio Foundation, to promote and develop social businesses in two rural communities with the goal of creating long-lasting sustainability for school operations. The partnership is entitled "Pwoje Ananda" which means "Project Joy" in Haitian Creole and Bengali. Conceived by Nobel Peace Laureate Professor Muhammad Yunus, a social business is created to solve a social problem and must follow several key principles. In May, a Consultant from YSB Haiti began working closely with Hope for Haiti to train local school partners on proper business administration and budgeting, the principles of social business, and facilitation of community dialogue. In one month alone, community members received 88 hours of training. Our partnership is now working to develop scalable social businesses for school-based communities, with the objective of creating a model that can be applied to other school partners. Based on each community's interests and requests, the following activities and businesses were created:

- ★ **Micro-Finance** - 255 women reached with financial literacy, trained in business, and provided with micro-credit loans through Haiti's largest micro-finance institution, Fonkoze, to invest in their small commerce activities.
- ★ **Upcycled Jewelry Production** - Women-owned and led rural business that makes upcycled jewelry. Sales not only support their families, but also their children's school. Jewelry featured in Gulfshore Life, Naples Charity Register, and è Bella Magazines! Product is being sold online, as well as at local retailers. For more information on how to make a purchase, please contact Hope for Haiti.
- ★ **Electricity brings social business opportunity!**
- ★ **Cell Phone Charging Station** provides a greatly needed community service as families do not have access to electricity at home.
- ★ **Freezer Business** which the community has named "Le Paradis des Amis" (The Friend's Paradise) sells cold drinks and ice.
- ★ **Agribusiness** - investing in tree nurseries and the production of fresh fruits and vegetables to bring to market.

COOKING WITH CARMENE

RECIPES FROM A HAITIAN KITCHEN

"We are excited to be working with Hope for Haiti and Professor Yunus to build sustainable social businesses within Hope for Haiti's supported communities. Investing in social enterprises means investing in businesses that have social impact so the money that is put into them keeps producing socially beneficial results without requiring continual support."

*- Ray and Barbara Dalio,
Dalio Foundation*

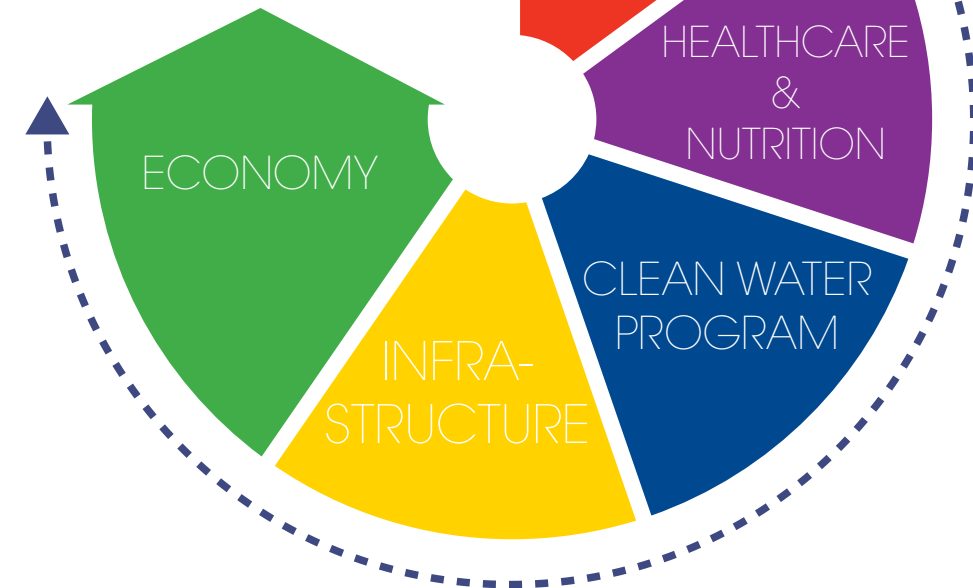

MAKING AN IMPACT

The greatest amount of progress or “geometric change” that Hope for Haiti has seen is in our approach to sustainable communities. What do we mean when we say “Creating a Sustainable Community?” It is our vision of putting ourselves out of business one community at a time. In order to do this, we need to create real long-term change, and we do this in a holistic partnership with local school communities by focusing on five key areas of development 1.Education, 2.Nutrition & Healthcare, 3.Clean Water, 4. Infrastructure, and 5.Economy. With a strong commitment to community-driven development and investing in these five areas, Hope for Haiti has seen a real shift not only in poverty levels, but what we would argue even more importantly, a change in mentality – a vision for the future.

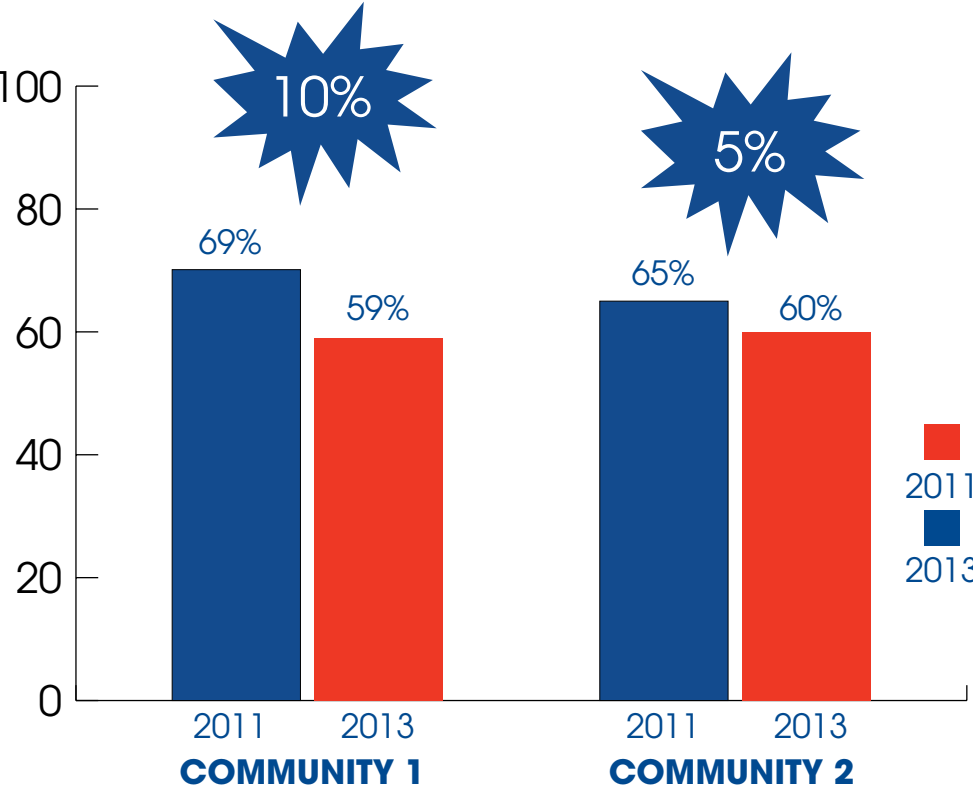

HOLISTIC APPROACH

During the Fall of 2011, Hope for Haiti began implementing the Progress out of Poverty Index™ survey in two rural communities to establish a baseline of the poverty level and measure progress over time. During the 2012-2013 school year, Hope for Haiti implemented the survey for a second time, training 22 survey enumerators and collecting information from over 360 households. The below graph illustrates the survey results comparing Year 1 and Year 2 of the percentage of households living under \$1USD per day. Within just over a one-year period, we found a 5% and 10% reduction in household poverty rates. There is not only Hope, but real Results.

CREATING SUSTAINABLE COMMUNITIES

2013 PROGRESS OUT OF POVERTY (PPI)™ SURVEY RESULTS

2014-2015 PREVIEW

As we look forward to celebrating our 25th Anniversary next year, we reflect on all that we’ve accomplished together. Our team is innovating each day with our donors, volunteers, staff and community partners. We are making a real impact, and we’re just getting started!

Sneak preview of new developments for 2014-2015:

- ★ Expanding our Sustainable Communities Approach
- ★ Implementing a newly developed Electronic Medical Record System (EMR) at Hope for Haiti’s Infirmary St. Etienne
- ★ Increasing our integrative healthcare approach through a multi-year grant commitment from AmeriCares
- ★ Investing in local Staff Development
- ★ Celebrating our partners and staff for being change makers in their communities

I believe that every life is valuable. That we can make things better. That innovation is the key to a bright future. That we’re just getting started.

- Bill Gates

THE REAL AWARDS

SOME PEOPLE ENTERTAIN US. SOME PEOPLE ENLIGHTEN US. SOME PEOPLE SAVE OUR LIVES.

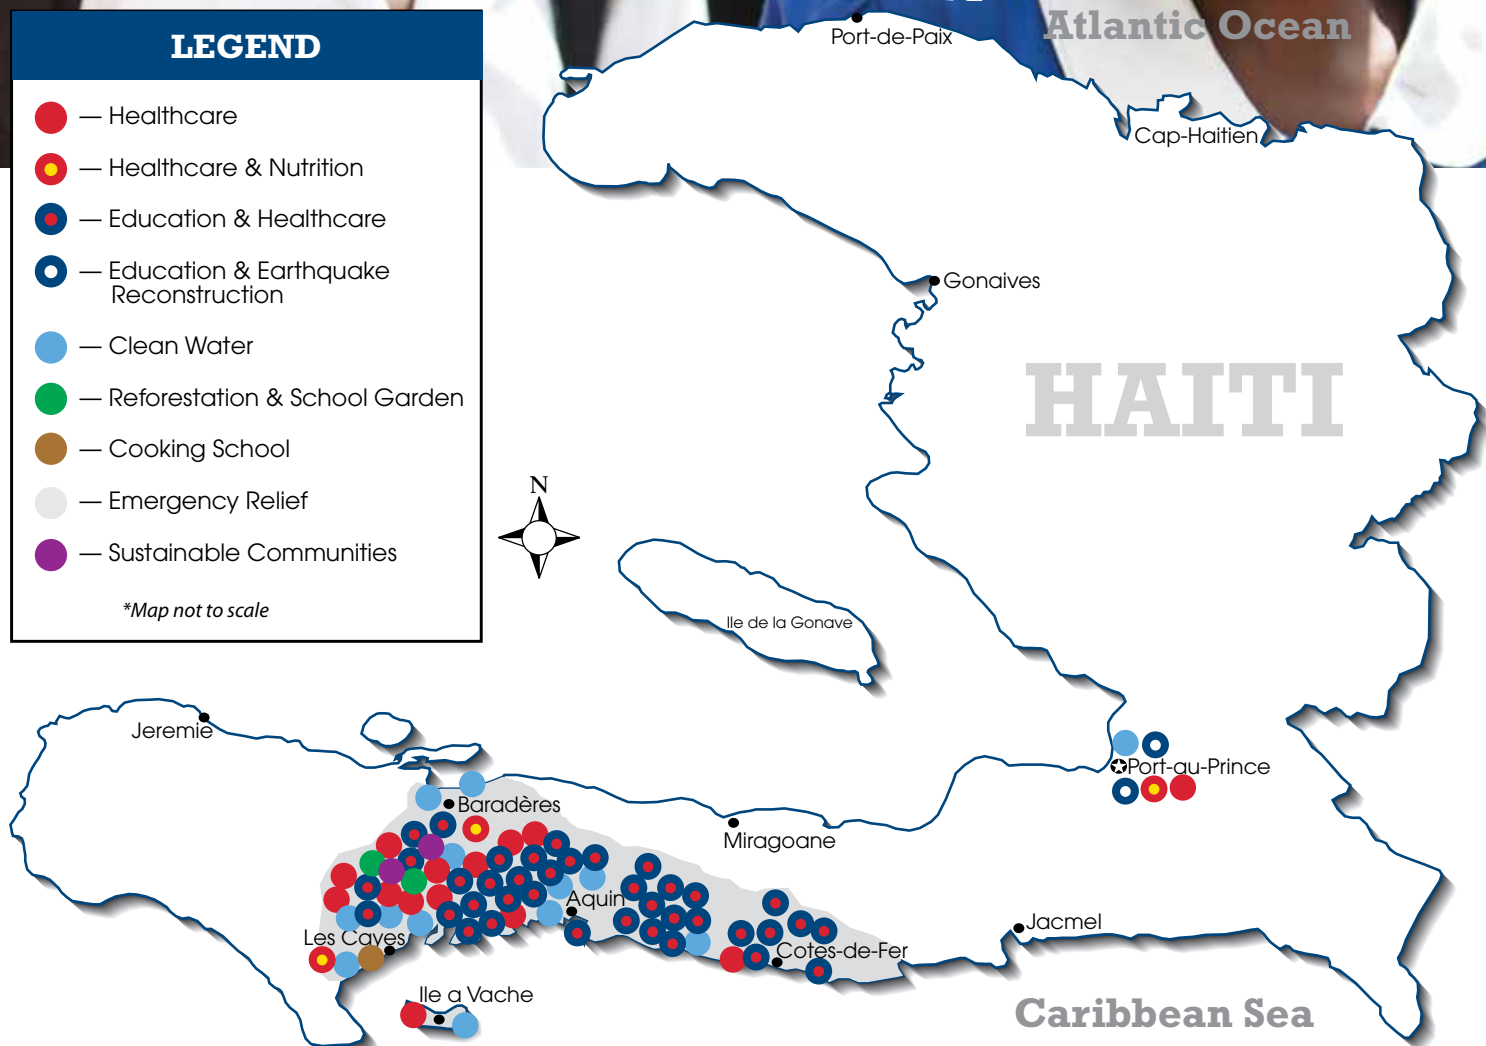

We are honored to have Infirmary Director Dr. Elmide Nazaire selected for the 2014 REAL Awards in recognition of her achievements as a global health worker. The REAL Awards, created by Save the Children in partnership with the Frontline Health Workers Coalition, is a first-of-its-kind global awards program designed to develop greater respect and appreciation for health workers and the lifesaving care they provide globally, as well as in the United States. The REAL Awards is made possible by the support of presenting sponsors like The Bill and Melinda Gates Foundation and Masimo Foundation for Ethics, Innovation and Competition in Healthcare.

VOLUNTEER THANK YOU

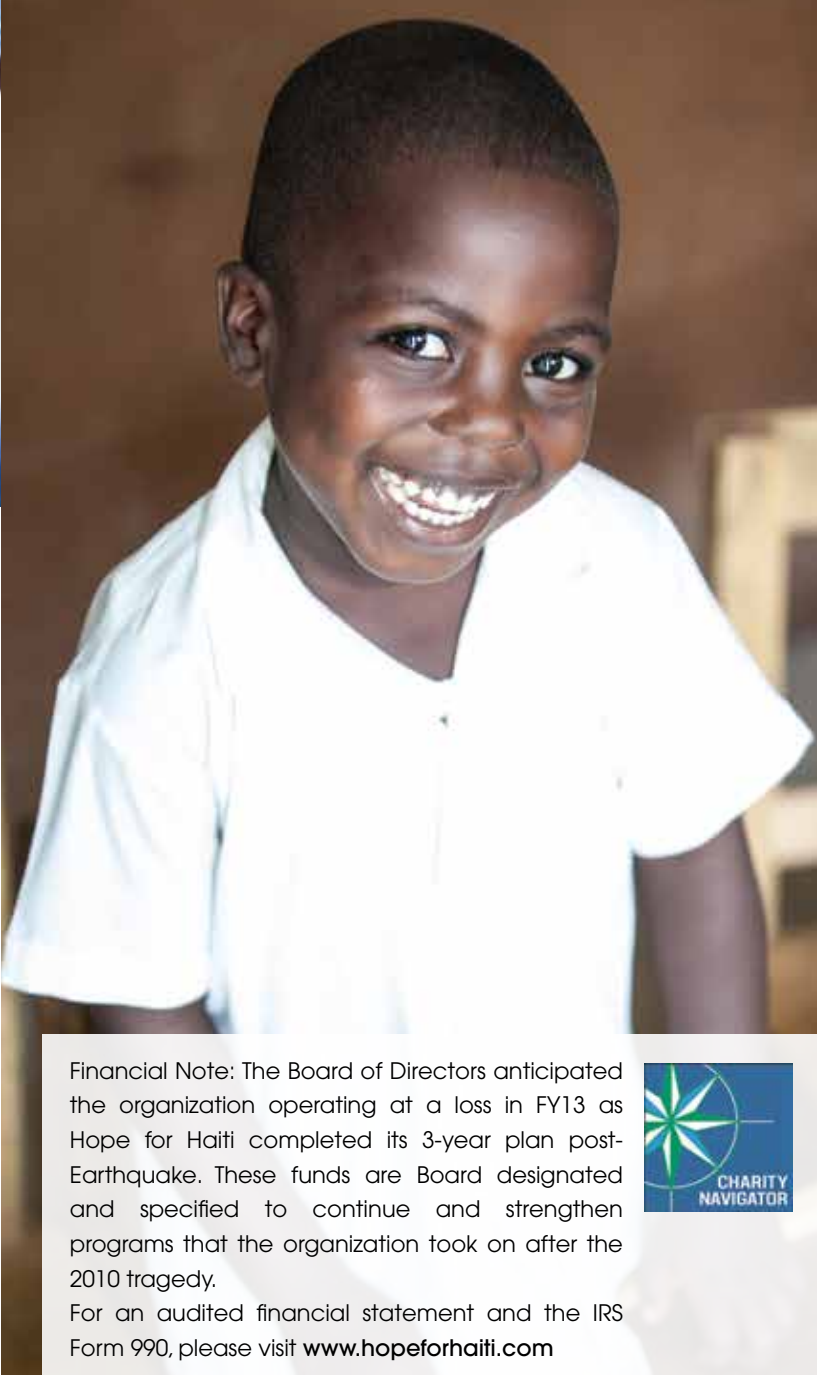

Your donations of time, talent, and treasure make all the difference! Our Naples headquarters works to procure, pack, and ship medications and supplies to Haiti. Basic supplies, like Tylenol and Band-Aids, are used in our Public Health First Aid Kits, providing schools with the materials they need to help keep kids healthy. Advanced supplies, including dental and laboratory items, are used at our Infirmary or delivered to our network of 22 healthcare partner sites. All of this wouldn't be possible without our amazing volunteers! The reason why Hope for Haiti is able to keep our expenses so low (below 5%) is because of all of the men and women who dedicate their time and talent to our many programs. Here is a glimpse of those volunteers in action.

PROGRAM LOCATIONS MAP

As you consider giving a gift to Hope for Haiti, we are committed to making every dollar stretch to meet the needs of our partners on the ground. We work to keep overhead costs down so that over 95 cents of every dollar donated to Hope for Haiti goes directly to increase the quality of life for the Haitian people through our core programs of education, nutrition & healthcare, and community development. Thank you for believing in us!

Financial Note: The Board of Directors anticipated the organization operating at a loss in FY13 as Hope for Haiti completed its 3-year plan post-Earthquake. These funds are Board designated and specified to continue and strengthen programs that the organization took on after the 2010 tragedy. For an audited financial statement and the IRS Form 990, please visit www.hopeforhaiti.com

GIVING LEVELS

With Every:

We Can:

\$10,000

Invest in a community by addressing their needs for the future.

\$5,000

Fund the operations of the Hope for Haiti Infirmary for one week.

\$2,500

Equip healthcare centers with lifesaving medications and supplies.

\$100

Deliver an Emergency Bucket to a family in the wake of a disaster.

\$50

Pay for x-rays for an emergency orthopedic case.

\$1

Nourish a seedling (fruit, coffee, and hardwood)

\$1,000

Provide a classroom of children with a quality education for a year.

\$500

Ensure that 12 clean water sites receive education, outreach and support for a month.

\$250

Support 5 Community Health Workers to bring public health materials to their community.

Every Gift Makes a Difference!
